MAGIC WAVE

S - T E C

A MAGIC FORMULA FOR THE PERFECT PERFORMANCE MIX

JP's most versatile wave board just got even better: now available in the featherlight S-TEC construction, the new Magic Wave takes your performance to the next level. With an updated shape for faster planing, improved control, and unmatched flow, it excels from small onshore waves to solid down-the-line conditions. A refined outline and bottom shape boost maneuverability and precision, while key construction tweaks cut weight by over half a kilo. One board. All conditions. Feel the MAGIC - redefined!

FREE-STYLE WAVE

PRO

ALL-IN-ONE

Still as all-round as ever, these lively and versatile shapes are JP's fastest and most manoeuvrable all-water toys. This year, they come with a refined fin trim: by moving the side fins closer to the centre, we've boosted control and manoeuvrability without losing planing power.

VOLUME

MAGIC RIDE

WOOD PRO

MAGIC MANOEUVRE FREERIDE

Stunning boards which do everything you'd expect from a freeride board – and they do it exceptionally well and exceptionally easily! Feeling playful and small, they sit high on the water, delivering the lively and sporty feel which makes windsurfing so exciting. They are fast, yet super easy to sail and control. These wide and thin boards willingly plane early. Their jibing potential impresses riders of all levels!

VOLUME

109

119

129

139

149

159

KEY FEATURES

- ||| *The easiest manoeuvre board in JP's freeride range*
- ||| *Easiest planing and jibing*
- ||| *Bottom V for great control and comfort*
- ||| *Sporty and energetic character*
- ||| *Foil Approved Powerbox (Wood Pro only); With NP Glide Wind foil, one of the easiest set-ups to start foiling*
- ||| *Magic Ride 159: The perfect board for every rider stepping down from beginner board with daggerboard*

**EASE, SMOOTHNESS,
FORGIVINGNESS
& CONTROL**

DECK SHAPE

Guarantees a comfortable stance in every foot strap option and makes getting in and out of the straps easy

OUTLINE

The stretched-out waterline makes early planing easier

[back to overview](#)

SLALOM

S - T E C

FIN-ONLY PERFORMANCE & SLALOM COMPETITION BOARDS

JP Slalom boards combine very low weight with high durability for early planing, precise control, and top speed. All shapes are tuned for efficient jibing and a comfortable stance. The Slalom features wide tails for leverage, individual tail cut-out configurations, transforming Vee flow, compact parallel outline, thin nose profile, and an ergonomic concave deck with mast box recess for control and efficiency. The SL 72 has been completely reworked to deliver increased speed, enhanced stability in rough water, improved gybing, and a more connected feel to the board.

SIZE

62.5

66

72

76

85

MAST RECESS

*For efficient air
flow and control*

KEY FEATURES

III Great overall performance due to our lightest S-TEC construction

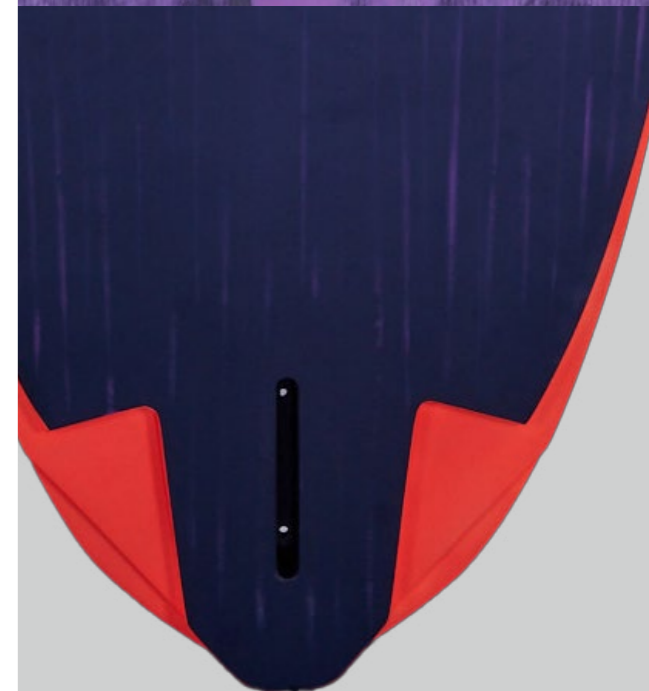

III Very light

III Great top end control due to centred swing weight

III Transforming Vee allows the board to ride high and loose

III Dual Tail Outline: Bottom and deck outline individually adjusted to each board size

III New SL 72 - Enhanced Performance: effortless chop handling, faster acceleration, and great control in the jibe

DUAL TAIL OUTLINES

The Cut-Out configuration reduces the outline width and the wetted surface of the bottom for less drag and higher speeds

**FULL CONTROL,
FULL SPEED**

[back to overview](#)

HYDRO FOIL SLALOM

S - T E C

PERFORMANCE WIND-FOIL SLALOM COMPETITION BOARDS

The HydroFoil Slalom boards are faster, lighter, and more aerodynamic than ever before. The updated HF SL 85 leads the way with a new shape designed for ultimate efficiency across all wind ranges, while the 80 and 88 guarantee top performance for lighter and heavier riders. Super-fast foil machines: Performance, power, and control for slalom competition. The stage is set to take your foil speed to the next level!

SIZE

80

85

88

TAIL DESIGN

Deck tail release cut-out for clean airflow separation

SHAPE HIGHLIGHTS NEW 85:

III Longer outline and optimized scoop-rocker line for earlier take-offs at lower speeds

III Sharp V-shape nose underside for compactness and stability

III Aerodynamic deck redesign for minimized drag, added lift, and stable flight

III New rail design reduces turbulence for smooth airflow and efficient water release

III Flatter deck around front foot for better leverage and power

III Refined back-foot rail shape for comfort and control

III Double strap plug option at back foot for customizable control and power

OUTLINE

Reshaped deck shape for improved aerodynamics

**OUTSTANDING
CONTROL OVER
THE FOIL**

KIDS & YOUTH

FOR THE FUTURE STARS

The board for kids who want to do what most windsurfers do: blasting back and forth at the utmost pace and throwing a carving turn now and then. The Magic Move does just that and the '90' is the right size for ambitious kids. The board is light and the footstrap plugs are adapted, meaning closer together to suit the kids' shorter legs and smaller feet. This makes this special Magic Move the ideal board for the freeriding Young Gun enthusiasts: Fun, fast and playful in turns and jibes!

SPECIFIC KIDS

- Stability & Comfort
- Easy Planing
- Freeride
- Performance
- Freestyle
- Wave & Swell
