F-WINGER

S - T E C

**LIGHTER,
STRONGER, AND
MORE EXPLOSIVE
THAN EVER,
NOW BUILT
IN OUR MOST
ADVANCED S-TEC
CONSTRUCTION!**

The F-Winger is built to handle modern freestyle progression while keeping every ride smooth and controlled. Its advanced S-TEC construction and proven shape make it the ultimate choice for riders who want maximum pop, precise control and comfort even with hard-core landings, and pure winging fun.

VOLUME

NOW FEATURING S-TEC

- /// Ultra-light EPS core with reinforced outer shell for maximum strength
- /// Full PVC sandwich with biax carbon and UNI-directional carbon patch at the standing and foil area
- /// Special lamination method ensures a pre-preg resin-to-fibre ratio for maximum stiffness at minimal weight
- /// Innegra rail and heel reinforcements protect against heavy landings
- /// Brushed carbon finish saves weight and delivers a sleek performance look

**AROUND 700 G
LIGHTER THAN ITS
PREDECESSOR**

CONSTRUCTION

The S-TEC construction takes the board to the next level

NEW ABSORBER PADS

Cushion even the hardest landings and ensure a secure, controlled stance

RS PRO

**MEET THE RS,
THE BOARD BUILT
TO MAXIMIZE
YOUR TIME ON
THE WATER - NO
COMPROMISES,
JUST PURE
FOILING FREEDOM**

From your first flight to full-throttle foiling, the RS delivers endless stoke. It's a board that inspires confidence, lets you explore new limits, and brings the perfect balance of performance, stability, and responsiveness. One board, countless possibilities.

VOLUME

65

80

95

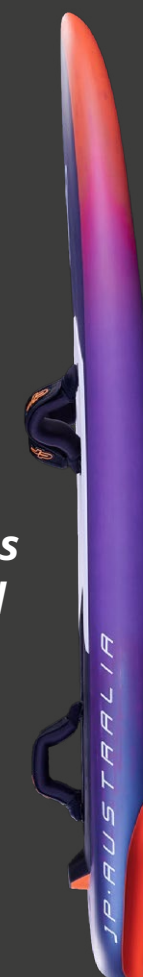

KEY FEATURES

- /// Optimized combination of length, volume, and outline
- /// Extended board length and narrow outline
- /// Rounded nose rails
- /// Defined tuck lines through the midsection to the tail
- /// Boxy deck rails for maximum standing area and overall stability
- /// Precise tail cut-outs
- /// Balanced planing surface

OUTLINE

Narrow outline and rounded rails offer sharp responsiveness for high-speed runs, tight turns, and quick rail-to-rail motion

PRECISE TAIL CUT-OUTS

Ensuring early take-off and preventing the tail rail from catching during radical turns

**REDEFINE
YOUR RIDE!**
