THE INVENTION OF HYBRID FOILING.

Four years of design, testing and development have brought us here, to the original hybrid dream; **ride any board, any foil, any way you like.**

As part of the Foil Drive family, we welcome you to a community focused on top performance, adaptability, high quality and superb support. Foil Drive is more than a product, part of what makes our Foil Assist a premium choice.

OUR FAMILY.

Proudly South Australian, our ever-growing team is driven by founders Paul and Ben. Celebrating four years of operation late 2024, we've gained global recognition and a dedicated following of Foil Drive's worldwide. With foundations now also in The Netherlands, we're stoked for another 12 months and look forward to taking Foil Drive further than ever.

OUR COMMUNITY.

The Foil Drive family extends to our Foilriding community. **We are incredibly proud of the community we have established**, one that is incredibly supportive of each other and one that has become a valuable group for insights and feedback. Foil Drive is for foilers, meaning our community feedback is at the front of our development as we constantly refine and imagine new ways to further enhance that foiling feeling we all love.

CATALOGUE CONTENT.

This catalogue is here to help you understand the full Foil Drive range. Dive into the range of Gen1 and Gen2, their accessories and everything else you need for your Foilriding journey. This catalogue will define compatibility and provide suggestions based on our extensive testing and community feedback.

Please keep in mind, our suggestions are a guide only. Many variables like rider weight, gear selection and use case all play a part in choosing the perfect Foil Drive for you!

THE FOIL DRIVE DREAM.

The dream has always been to **enhance the pure feeling of foiling while making the sport more accessible, enjoyable and fun.**

In this catalogue we present our comprehensive product lineup, showcasing the Gen1 and Gen2 Foil Assist series.

Gen2 Assist Slim and Assist MAX: Our flagship product line, the Gen2 Foil Drive, features the Assist Slim and Assist MAX models, each representing the pinnacle of our dedication to innovation, performance, and rider experience. The Gen2 range is unparalleled, designed with meticulous attention to detail by foilers, for foilers. This is far more than just another motor for your foil; it is a carefully engineered system where every millimeter and every gram is optimised to deliver an unmatched riding experience.

Gen1 Assist and Assist PLUS: The heart of the foil assist community, The Gen1 range is where the craze of assisted foiling began. Providing a lightweight propulsion system that retrofits seamlessly onto your existing foil board, elevating your foiling experience.

Whether you're a seasoned foiler looking to upgrade to the latest and greatest or a newcomer eager to embark on your foiling journey, our 2024-205 Product Catalogue has something for everyone.

It's a comprehensive guide that allows you to explore our entire range, compare features, and choose the perfect foil assist system for your foiling adventures.

GEN2

FOIL DRIVE KITS

If you're new to Foil Drive, it's important to know the differences between the two generations.

Gen1 is our original product that has been available from day one. Mounted to the top of the board, the **Assist PLUS** is perfect for the entry level Foildriver and is a great way to step into the sport.

Gen2 takes everything Foildrivers have come to love and has been enhanced dramatically. Everything from the fit and finish, to the capabilities and features, Gen2 is an all rounder. Mounted between the board and the mast, the **Assist MAX and Assist Slim** diversify the range and are a step up in the world of hybrid foiling.

FOIL DRIVE ASSIST MAX GEN2

The **Assist MAX** is exactly that, an all rounder with maximum power, runtime, thrust and versatility. This is the largest Foil Drive suitable for any rider at any skill level!

- *Max Thrust: 27.5kg (60.6lbs)
- *Max Output: 1.95 Horsepower
- *Weight Range: 3.4 - 4.5kg (7.4 - 9.9lbs)
- Max Dimensions: L525 x W125 x H50mm
L20 x W4.9 x H1.9 inches
- Min Dimensions: L415 x W125 x H50mm
L16 x W4.9 x H1.9 inches

* Dimension/weight variations based on different batteries. Max Thrust based on Three Blade Propeller, data will vary based on real world, rider variables (Full real world thrust analysis available online).

FOIL DRIVE ASSIST SLIM GEN2

The **Assist Slim** is smaller and lighter with a shorter run time, designed for performance foiling. It offers enough power for assisted foiling, while remaining super compact!

- *Max Thrust: 25.5kg (56.2lbs)
- *Max Output: 1.8 Horsepower
- *Weight Range: 2.3 - 2.8kg (5.0 - 6.1lbs)
- Max Dimensions: L510 x W125 x H35mm
L20 x W4.9 x H1.3 inches
- Min Dimensions: L415 x W125 x H35mm
L16 x W4.9 x H1.3 inches

* Dimension/weight variations based on different batteries. Max Thrust based on Three Blade Propeller, data will vary based on real world, rider variables (Full real world thrust analysis available online).

FOIL DRIVE PLUS ASSIST

GEN 1

The original retro-fit kit with everything you need for assisted foiling, mounted to the top side of your board. A great entry level kit, the **Assist PLUS** is a great step into hybrid foiling.

*Max Thrust: 25kg (55.1lbs)

*Weight Range: 2.6 - 3.7kg (5.7 - 8.1lbs)

Dimensions: L270 x W115 x H70mm

ASSIST

While the **Assist** system is no longer in production, we continue to supply spare parts, batteries and accessories for our Assist riders.

Image: Shannon Stent

BATTERIES

Each of our Assist Kits are compatible with their own Foil Drive batteries that offer different benefits for different use cases, runtime, power, weight and compatibility are all key variables.

The Lithium-Ion Battery Cells used in the Foil Drive systems feature the highest energy density available while maximising the power output, run time and performance of the system. This means we really are packing as much as we can into such a small space!

We highly recommend reading our information about Battery Care & Storage available on our online Help Centre.

There are 10 Foil Drive batteries* across the range:

Assist - Standard Battery
Assist PLUS - Standard Battery
Assist PLUS - Medium Battery (No longer in production)
Assist PLUS - Small Battery

Assist Slim - Performance Battery
Assist Slim - Endurance Battery
Assist Slim - Travel Battery
Assist MAX - Sport Battery
Assist MAX - Power Battery
Assist MAX - Travel Battery

FAQ

Are batteries cross-compatible?

Foil Drive batteries are NOT cross compatible across units ie. An Assist battery cannot be used in an Assist PLUS.

What is the lifespan of a battery?

All batteries have a useful lifespan and are consumables. Due to battery chemistry, every time a battery is used it will slowly degrade and the loss of full power output and capacity will eventually become noticeable. Depending on how often it is used, 1-2 years of good performance is typical when cared for correctly. More information can be found on our Help Centre.

Are they waterproof?

Not all Foil Drive Batteries are waterproof and should be treated with care, especially around salt water. While we do improve waterproofing, they remain water resistance. The Gen2 batteries are IP68 Rated when used with Foil Drive Battery grease. If your battery is exposed to water, please contact us.

How much runtime?

Battery runtime is a very hard number to give a single answer to. Foiling is an incredibly dynamic and complex sport, making it impossible to have fixed values. While we do provide average runtime, we believe in honest, real world examples. Available online on the Foil Drive Compare page is an extensive look into each battery, comparing rider weight, gear and more in order to give you the best idea of how much you can get out of each battery depending on your specific use case.

Can you fly with them?

Airlines have very strict restrictions with Batteries where they must fall under 160Wh. The following pages have an airline icon next to the compatible batteries, please contact your airline before traveling as all airlines have varying restrictions.

GEN2 FOIL DRIVE BATTERIES ARE IP68 RATED MAKING THEM DUST AND WATER RESISTANT.

Assist PLUS Standard 12.6ah Battery: Designed for all disciplines, this is the largest, most popular Assist PLUS battery.

Capacity: 12.6Ah	Appx. Charge Time: 3 Hours	Compatibility: Assist PLUS
Volts: 28V	Weight: 1.7kg (3.7lbs)	SKU: 002
Energy: 362.8Wh	Install Weight: 3.7kg (8.1lbs)	

Assist PLUS Small 4.2ah Battery: For the weight conscious rider, these are perfect for wingers, pump practice or those not needing the full runtime. These are also airline friendly!

Capacity: 4.2Ah	Appx. Charge Time: 1 Hours	Compatibility: Assist PLUS
Volts: 28V	Weight: 0.6kg (1.3lbs)	SKU: 003
Energy: 120.9Wh	Install Weight: 2.6kg (5.7lbs)	

Assist PLUS Airline Travel Bundle: The Small Batteries are compliant with most airline requirements, making them a game changer for travelers. A Parallel Y Lead connects 2x Small Batteries together creating the capacity of an 8.4ah battery (2/3's a Standard Battery or a Medium Battery).

Included:	Note: Small Batteries cannot be used for flatwater Foildriving even when connected together.	Compatibility: Assist PLUS
- 2x Small Batteries		SKU: 004
- 1x Parallel Y Lead		
- 1x Battery Checker		

Kit Install Weight: 3.3kg (7.25lbs)

Assist Standard 12ah Battery: Designed for all disciplines, this is the largest, most popular Assist PLUS battery. The Assist system cannot be used for Flatwater Foildriving.

Capacity: 12Ah	Appx. Charge Time: 3 Hours	Compatibility: Assist
Volts: 22V	Weight: 1.7kg (3.7lbs)	SKU: 006
Energy: 259Wh	Install Weight: 3kg (6.6lbs)	

GEN1

GEN1

GEN1

GEN1

SKU: 104

Assist Slim Endurance Battery: The larger Slim battery, great for longer runtime. However, with a lower voltage, it doesn't not provide the same level of thrust as the Slim Performance Battery.

Capacity: 8.4Ah	Appx. Standard Charger Time: 2 Hrs
Volts: 28V	Weight: 1.4kg (3lbs)
Energy: 241.92Wh	Install Weight: 2.3kg (5.0lbs)
Compatibility: Assist Slim	Battery Dimensions: 410x75x21mm

GEN2

SKU: 105

Assist Slim Performance Battery: The smaller Slim battery, great for those who're wanting a punchy, high performing, light-weight ride at the cost of less runtime than the Endurance.

Capacity: 4.2Ah	Appx. Standard Charger Time: 1 Hr
Volts: 40V	Weight: 1kg (2.2lbs)
Energy: 166.32Wh	Install Weight: 2.8kg (6.1lbs)
Compatibility: Assist Slim	Battery Dimensions: 320x75x21mm

GEN2

SKU: 102

Assist MAX Sport Battery: The smaller, lighter MAX battery, offering a reduce weight for those riders looking for ultimate performance at the cost of reduced runtime.

Capacity: 8.4Ah	Appx. Fast Charger Time: 1.5 Hrs
Volts: 40V	Appx. Standard Charger Time: 2.5 Hrs
Energy: 332.64Wh	Weight: 1.8kg (3.9lbs)
	Install Weight: 3.4kg (7.4lbs)
Compatibility: Assist MAX	Battery Dimensions: 290x75x40m

GEN2

SKU: 101

Assist MAX Power Battery: The largest MAX battery offering the longest run time with high power performance.

Capacity: 12.6Ah	Appx. Fast Charger Time: 2 Hrs
Volts: 40V	Appx. Standard Charger Time: 3.5 Hrs
Energy: 498.96Wh	Weight: 2.6kg (5.7lbs)
	Install Weight: 4.5kg (9.9lbs)
Compatibility: Assist MAX	Battery Dimensions: 420x75x40mm

GEN2

FOIL DRIVE CHARGERS

There are multiple chargers available for the Gen2 range, two standard chargers and one fast charger, and two chargers for the Gen1 range. Each charger has specific compatibility and must be used with the correct battery. Cross check by comparing the Voltage on the battery, matches that on the charger.

40V Standard Charger 4Ah Slim Performance, Slim Travel, MAX Sport, MAX Power, MAX Travel
40V Fast Charger 8Ah Slim Performance, MAX Sport, MAX Power
28V Standard Charger 4Ah Slim Endurance, Assist PLUS Standard, Assist PLUS Small
22V Standard Charger 4Ah Assist Standard

NOSE CONES

All Gen2 batteries have a specific letter printed on them, this is to help identify the corresponding nose cone to use when closing up your unit. Eg. The Assist MAX Sport Battery has a B printed on it, this must be used with Nose Cone B.

The nose cone makes up the housing of the electronics box, encapsulating the battery inside. It is imperative the correct nose cone is used by simply matching letters.

SKU: 105

SKU: 103

SKU: 106

SKU: 104

GEN2

SKU: 188

Assist MAX Travel Battery: The Assist MAX Travel Battery breaks down into 3 pieces for Airline Travel. When connected it requires the A Nose Cone and operates on 40 volts. Full information on capacity and weight will be available late 2024.

GEN2

SKU: 189

Assist Slim Travel Battery: The Assist Slim Travel Battery breaks down into 2 pieces for Airline Travel. When connected it requires the C Nose Cone and operates on 40 volts. Full information on capacity and weight will be available late 2024.

ROTOR

STATOR

CABLE

MOTOR SYSTEMS

The introduction of Gen2 Foil Drive has also seen an increase in options when it comes to Motor Systems. Different cable lengths are crucial as they allow the rider to place the motor in varying positions on the mast.

Gen1 Foil Drive systems feature an inbuilt, fixed motor cable with 200cm length. This gives ample length to run the motor at any height on the mast with versatile box mounting options. Excess cable can be coiled up and tied off when now in use.

Gen2 utilises the same robust motor, propellers and mast adaptor as Gen1 with changes to the system modularity. A custom water resistant motor plug seamlessly connects the electronics box to the motor allowing rider to interchange between a range of different cable lengths. In 2024 we introduced the new Version 2 Motor where the cable is now also detachable at both ends (The electronics box and the motor), meaning you can change cable lengths while using the same motor.

Integrated Masts have become highly desired within the Foil Drive community as they reduce drag, improve rider feeling and minimise install time. We have a stack of new collaborations in this space for 2025 as part of our **Powered By Foil Drive** range.

GEN2 MOTOR SYSTEMS

Gen2 Motor Systems are available in 6 different lengths that are interchangeable. The length being the distance between the base plate and the motor position on your mast. **Version 2 Motors** now allow users to easily change cable length, while use the same motor and electronics box. Each position has been curated for specific use:

12 & 15 CM
4.7 & 5.9 IN

We often refer to these positions as *slammed* as it's as close to the board as possible without noticing interference due to it's proximity to the board. The ideal for those wanting assistance to get on foil, and have their motor exit as soon as they're on foil.

Surf - Wing - Pump - Wake

20 CM / 7.8 IN

A step down from the slammed position, this is most common for most riders wanting assisted power in most disciplines. The motor remains in the water a little longer meaning you can really rely on it to get you up and running.

Surf - Wing - Downwind - Pump - Wake

25 CM / 9.8 IN

Wanting to flatwater Foildrive back to the lineup? Learning to surf, downwind or wing? The mid mast position gives you enough depth to motor around but remains high enough to pop the motor out of the water once you're up on foil and feeling ready to glide naturally.

Surf - Wake - Flatwater - Learn

60 & 70 CM
23.6 & 27.5 IN

Positions close to the fuselage are ideal for flatwater Foildriving and learning. A 60cm and 70cm Motor are available with the same use case. The 60cm Motor is suitable for masts up to 60cm long, where as the 70cm Motor is for masts longer than 70cm.

Flatwater - Learn

ABOUT MOTOR
LENGTHS

INDIVIDUAL CABLES
SKU: 186-XX

Image: Shannon Stent

* 6x Keys from 5mm to 30mm (Only to be used in Nose Piece)

- A** Universal Motor Pod Small Nose Piece
- B** Universal Motor Pod Rear Piece
- C** Universal Motor Pod Large Nose Piece
- D** Universal Adaptor Small Nose Piece
- E** Universal Adaptor Rear Piece
- F** Universal Adaptor Large Nose Piece
- G** Universal Adaptor Keys*

SKU: 095

The **Universal Motor Pod** is an important part of the Foil Drive setup and it must be used with Mast Adaptors.

These outer sleeves are universal and can easily adapt from mast to mast by simply interchanging the internal Mast Adaptor pieces.

The combination of the Universal Motor Pod and the Mast Adaptor is a V2 refinement of the original one piece motor pods that we started with. These outer sections are super strong injection molded poly-carbonate fiberglass reinforced.

1x Large Pod Nose, 1 x Small Pod Nose,
1x Common Rear Section, 4x Bolts (M3x12mm)

Note: The Universal Motor Pod is compatible with both the Universal Adaptor and Custom Mast Adaptors.

UNIVERSAL
ADAPTORS

CUSTOM
ADAPTORS

SKU: 151

The **Universal Mast Adaptor** is made of a soft, flexible material that can de-form around your mast to create a solid and secure connection for your motor. The unique design features six sized "keys" that are to be installed into the front of the adaptor to allow for fitment of all different sizes and shapes of mast between 90mm and 150mm.

It is important the key you select is the correct size, to still allow a **clamping force of the two halves**. We **highly recommend watching the installation video**. The Universal Motor Pod is required, this is the Adaptor ONLY.

1x Large Nose Adaptor Piece, 1x Small Nose Adaptor Piece
1x Rear Adaptor Piece, 6x Keys (Various Sizes)

SKU: 007 (FOLLOWED BY ADAPTOR NUMBER)

Custom Mast Adaptors are available for those who's mast is outside of the compatibility of the Universal Mast Adaptor. We have over 100 different custom mast adaptors that are custom made to fix an exact mast. We recommend custom adaptors only to those who have already tried a Universal Adaptor, or if you mast falls outside of the compatible chord measurements of 90mm to 150mm.

The QR Code on the right displays the custom adaptors available OR search Custom Mast Adaptor on our Help Centre. If your mast isn't listed, these can be made on request.

POWERED BY FOIL DRIVE

Mast Integrations have quickly become a very popular addition to a Foildrivers quiver. While the motor position becomes fixed, and permanent, the benefits of having the cable run internally are drastic. Not only is installation now a breeze, but the ride feeling becomes even better as the motor becomes almost unnoticeable. Having the cable internal also increased runtime as the drag is reduced. we are excited to announce more collaborations with your favorite brands to allow for more adaptability and refinement than ever.

Why an Integrated Mast?

We often have people ask why they should choose an Integrated Mast over an external cable. Wouldn't you want to keep it removable? For some people, once they attach their Foil Drive, they never take it off. The option to have the mast Integrated with the motor allows people to further fine tune their set up. In the same way you might change foils or fuselage length to slightly improve your ride, integrating your motor to the mast provides this same fine tune improvement.

FOIL DRIVE x CEDRUS

Cedrus, based in California, offers handcrafted, ultra-stiff foil masts with custom, interchangeable fuselage adapters. These adapters allow riders to use different foil brands with their mast, aligning with Foil Drive’s vision of versatile gear setups.

Foil Drive provides a range of adapters, with additional options available directly from Cedrus. Simply choose your motor height, Foil Drive kit, and adapter for a streamlined, drag-free installation. Depending on your mast, you may need either a mast adapter or a full fuselage adapter.

While motor positions are fixed and cannot be adjusted after installation, the Cedrus x Foil Drive Mast Integration is perfect for riders who prefer a permanent motor placement.

Adaptors available from Cedrus:

Armstrong	Lift
Axis	SAB
Cabrinha	Slingshot
Cloud IX	Takuma
Code Foils	Unifoil
F-One	+ More

Mast Specs:

Material: 19mm Anodised Aluminium
Length: 80cm

FOIL DRIVE x

AXIS Foils is based in New Zealand and California and offers an extensive range of foiling gear for all abilities and disciplines. The AXIS x Foil Drive collaboration features the 19mm Aluminium Mast.

This collaboration is for the AXIS rider who wants to embrace their Foil Drive, while preserving the streamline, highly responsive design of the AXIS masts. Designed for the entire foil line, the AXIS masts are stiff, strong, and ready for any use and conditions.

While motor positions are fixed and cannot be changed once installed, the Axis x Foil Drive Mast Integration is perfect for riders who know exactly where they want their motor, and never want to move it!

Mast Specs:

Material: 19mm Anodised Aluminium
Length: 82cm

*Please specify if you require a Doodad and Bolts

FOIL DRIVE X NoLIMITZ

The Foil Drive NoLimitz V2 Integrated Mast combines the lightest stiff mast in the world with the lightest, most powerful electronic motor in the world. The result is a beautifully integrated product that results in a lighter, faster, and more efficient set up. As seen in the videos - the ride is silky smooth, responsive, and quick. Significantly, there is a 15-20% increase in battery life due to the NoLimitz's reduction in drag and ease in popping up out of the water.

The V2 NoLimitz Mast is significantly stiffer, significantly faster, and still featherlight. Using a layup of high modulus materials and our proprietary hollow core technology, NoLimitz have achieved more with less. The result - an ultra stiff, thin and fast, featherweight mast.

Adaptors available from NoLimitz:

AFS	Mike's Lab
Axis	North
Cabrinha	SAB
Code	Takuma
F-One	Triton
Lift	UniFoil

Mast Specs:

Material: Carbon
Length: 78 or 85cm

GEN1 MOTOR SYSTEMS

Gen1 Motor Systems are available with a fixed cable length of 200cm (78.7 inches). The length being the distance between the Electronics Box and the motor. Gen1 Motor Systems cannot be modified or detached as the cable is hardwired into the Electronics Box and the Motor.

Excess cable can always be coiled up at the electronics box when not in use

Note: Prior to the launch of the Gen2 Motor System in 2023, customers had the opportunity to order varying cable lengths. We have now removed this option as 200cm has become a universal length for all use cases.

Top Tip Unless using an Integrated Mast, Mast Cables Guides must be used as they heavily reduce drag, improving performance. Be sure to tape your cable on with minimal lumps and bumps, and all the way down to the motor for best results!

FOIL DRIVE GEN2 APP

The brand new Foil Drive app has been created to get even more out of your Gen2 Foil Drive unit.

Using a wireless Bluetooth chip in the Units, you can now fine tune your Foil Drive ride experience adjusting settings such as:

Power Modes

Learn, Low, Medium and High Power modes let you adjust the maximum thrust output of your system.

Boost Modes

Allows you to program up to 20% additional boost thrust to help you get out of the water faster on small foils and boards or for heavier riders

Latency Adjustment (Advanced Setting)

Adjustment of the delay time between the controller loosing wireless signal and the motor cutting out.

The app is super important for configuring your Assist Slim unit when using 2 different voltage batteries. The Assist Slim needs to be programmed to use either the 40v Slim Performance battery or the 28v Slim Endurance battery before use, or you risk permanent damage to your battery.

This is just the beginning for the Foil Drive App, we have developments in the works for more user information and helpful tips and tricks to be integrated into the app as well as system feature updates and eventually a community section for GPS based activities and features.

**Available on Android and IOS devices up to 2 years old.
Requires Android 12 and above or iOS11 and above.**

ACCESSORIES

While every Foil Drive comes with everything you need to get started, we offer a range of different accessories that allow you to customise your rider and make small changes to better suit your specific needs.

From mounting hardware to custom brand collaborations, we've got it all. Can't find what you're looking for? Try the Repairs section.

Foil Drive External Antenna: 1x Antenna, 1x Deck Mount, 2x Nose Cone Pads

The Foil Drive External Antenna allows you to place a secondary antenna on the top surface of your board for increased signal strength and connection with Gen2 Assist MAX and Assist Slim systems. Majority of boards DO NOT need an Antenna. If the board is Carbon with Carbon Tracks, you might need an Antenna. We recommend trying your board before purchasing this accessory.

SKU: 167-X

SKU: 027	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Mounting Base Plate: 1x Polycarbonate Plate, 4x 3M Dual Lock, 1x Rubber Strap Using two foot strap screws, secure the plate to your board then attach your box to the plate, a front and rear slot in the plate allow a strap to further secure the box. Foot strap screws not provided as lengths vary.
SKU: 028	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Low Profile Anchor Points: 12x Anchor Points, Rubber Strap, 4x 3M Dual Lock Low Profile Anchor Points are the perfect addition to your kit to ensure it remains in place! Stick these directly to your board and use the provided strap to secure your kit.
SKU: 079	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Rubber Strap and 3M Dual Lock: 1x Strap, 4x Pieces (2 Pairs) 3M Dual Lock Rubber Strap and 3M Dual Lock for your Mounting Base Plate or Low Profile Anchor Points. All Low Profile Anchor Points and Mounting Base Plates come with these items supplied.
SKU: 018	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		3M Dual Lock: 4x Strips 3M Dual Lock (2 Pairs) 3M Dual Lock Strips secure the Gen1 Foil Drive Box to your board or the Mounting Base Plate.

SKU: 116-03	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Stainless Steel Bolt Kit Gen 1: 3x Puck Bolts - M3 12mm, 4x V2 Universal Motor Pod Bolts - M3 12mm, 2x Propeller Bolts - M3 30mm, 2x Latch Locking Bolts - M3 30mm, 4x Motor Bolts - M4 10mm, 4x Hub Bolts - M4 10mm, 2x Paddle Mount Bolts - M3 35mm Stainless Steel 316 Bolts for Gen1 Foil Drives, this kit includes every bolt you could ever need.
-------------	--	---	---

SKU: 148	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Integrated Mast Mounting Bolts: 2x M8 16mm Bolts, 3x M4 10mm Bolts These are the bolts required for securing your integrated mast to your Gen2 Foil Drive for easy assembly and transport using carbon boards.
SKU: 115	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Nose Cone Rocker Foam Pad: 2x D Shape Adhesive Foam Pads This is a replacement Nose Cone Rocker Foam Pad. It's designed to provide cushioning between the Foil Drive Nose Cone and board where a gap may be present.
SKU: 142 143	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Locking T Nuts: SKU: 142 4x M6 Locking T Nuts SKU: 143 4x M8 Locking T Nuts Foil Drive Locking T Nuts are made from 316 Stainless Steel and are available in M6 and M8. Included with all Gen2 Systems, these T Nuts slide into your mast tracks and are able to lock in place once you know exactly where you need them. This makes installation 10x faster and ensures your gear stays exactly where you want it, every time.
SKU: 116-X	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Stainless Steel Bolt Set: MAX SKU: 116-01 Assist MAX Kit SKU: 116-02 Assist Slim Kit Entire Bolt Hardware Set for Gen2 Series Foil Drive. Quantities of bolts differ for Slim and MAX.

SKU: 117-X	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Mast Plate Bolts & Locking T Nuts: 4x T40 Bolts, 4x Locking T Nuts, 4x M3 x 20mm Bolts (Varying bolt dimensions specific to each system noted below). SKU: 117-01 M8 80mm Assist MAX SKU: 117-02 M6 80mm Assist MAX SKU: 117-03 M8 60mm Assist Slim SKU: 117-04 M6 60mm Assist Slim Securely attach your Foil Drive Unit to your mast with these Mast Plate Bolts + Locking T Nuts. Reliable and easy to install, these bolts and nuts lock your system into place.
------------	--	---	---

SKU: 020	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Board Cable Guides: 2x Long Board Cable Guides, 1x Short Board Cable Guide Board Cable Guides adhere to your board and hold the cable in place. If you have a longer cable length additional Board Cable Guides may be required to secure the whole length of your cable onto your board.
SKU: 019	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Mast Cable Guides: 2x Mast Cable Guides Additional or replacement Rubber Mast Cable Guides for securing your motor cable to the trailing edge of your mast. These are super important in order to maintain a streamline finish, longer masts may require additional guides.
SKU: 009	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Additional Board Install Kit: 4x Pieces 3M Dual Lock, 2x Long Board Cable Guides, 1x Short Board Cable Guide, 2x Mast Cable Guides Have multiple boards or need to freshen up your existing installation? The Additional Board Install Kit includes everything you need to attach your electronics box to your board, and correctly secure the cable to your mast.
SKU: 085	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Kaohi Leash x Foil Drive Wrist Leash: 1x Kāohi Leash x Foil Drive Wrist Leash Combine the best of both worlds with the Kāohi Leash x Foil Drive Wrist Leash for Throttle Controller. Specifically designed for Foil Drive Controllers, the adjustable Kāohi Leash Cuff secures your controller to your wrist.
SKU: 140	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Foil Drive Controller Leash: 1x Foil Drive Controller Leash Included with Foil Drive Kits, this leash is available to connect your controller to your wrist.

SKU: 008	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Paddle Mount: 1x Paddle Mount, 1x Reversible Wedge, 2x M4 10mm Bolts Control your Foil Drive from your paddle with our ergonomically designed Paddle Mount. These mounts easily install to your paddle and can be altered for both goofy and natural footed riders, simply switch the position of the removable wedge.
SKU: 025	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Re-Usable Rubber Tie: 2x Re-Usable Rubber Ties Whilst designed to tidy your cable, or secure your controller to your paddle, these little re-usable ties are super handy! Every kit comes with a tie but we're sure you've got 1000 ideas on where else you can use them so grab yourself a two pack!
SKU: 176	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Foil Drive Propeller Guard: 1x Propeller Guard Designed for those wanting to add some bump protection, the propeller guard is most definitely not for everyone but is available for those who want added peace of mind.
SKU: 167-X	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Foil Drive External Antenna: 1x Antenna, 1x Deck Mount, 2x Nose Cone Pads The Foil Drive External Antenna allows you to place a secondary antenna on the top surface of your board for increased signal strength and connection with Gen2 Assist MAX and Assist Slim systems.
SKU: 109	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Axis Foils Doodad: 1x Axis Doodad and Hardware 19mm Alloy Used to connect your 19mm Integrated Axis Mast to your Fuselage, AKA "Doodad". This does not come with Mounting Bolts.

SKU: 139	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Controller Wireless Charger Pad: 1x Wireless Controller Charge Pad and USB Cable Additional Wireless Charger Pad for Foil Drive Controllers
	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Controller Charge Cradle: 1x Charger Cradle (Charging accessories not included) Designed to perfectly fit your Foil Drive Controller and Charge Pad, the Charge Cradle can be mounted to a bench or wall, particularly useful if charging on the move!
	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Foil Drive Throttle Controller V2 1x Wireless Throttle Controller, 1x Wrist Floaty, 1x Charge Pad and Cable, 1x Re-Usable Silicon Tie The high powered V2 Controller makes using smaller boards even easier. With improved connectivity, these are compatible with all Foil Drives (Note: Foil Drive Assist cannot make use of the additional telemetry data readings of these controllers).
	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Durable Hub: 1x Durable Propeller Hub, Install Hardware (Props not included). The durable hub is for plastic Standard or Durable Propellers only. If you plan to foil in debris heavy waters, we recommend having a spare hub in your kit! This hub cannot be used with Aluminium Propellers.
SKU: 015	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Nylon Hub: 1x Nylon Hub, Installation Hardware (Propellers not included). Nylon Hub for Aluminium Propellers.

SKU: 011	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Aluminium Propeller Hub: 2x Aluminium Propellers, 1x Nylon Hub, Mounting Hardware Aluminium Propellers are the ultimate upgrade providing maximum performance, durability and style. These Anodised, 5 Axis CNC Machined blades have a refined shape, and are thinner, stronger and sleeker.
SKU: 087	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Three Blade Propeller Hub: 1x Three Blade Hub, Installation Hardware (Propellers not included). Replacement Three Blade Propeller Hub for Aluminium Propellers.
SKU: 088	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Three Blade Propeller Hub Set: 3x Aluminium Propellers, 1x Three Blade Hub, Mounting Hardware Designed to increase low end thrust, the Three Blade Propeller Hub is an optional upgrade for riders pushing the limits of rider weight, board size and foil size. It is not suitable for Flatwater Foilriding.
SKU: 089	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Three Blade Propeller Hub Upgrade: 1x Aluminium Propellers, 1x Three Blade Hub, Mounting Hardware An upgrade set for existing customers who wish to use their existing 2 blades on a Three Blade Hub. Note: This must be used with all three propellers.
SKU: 090	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Three Blade Propeller Hub and Rotor Bundle: 3x Aluminium Propellers, 1x Three Blade Hub, 1x Protective Stubby Cooler, 1x Motor Can/Rotor This bundle allows riders to have two rotor and propeller set ups to quickly interchange their set up from two to three propellers, ideal if you have multiple riders, or use cases!

SKU: 083	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Motor Pod Blank: 1x Motor Pod Blank, Bolts Not Included - To use your existing bolts Pod blanks fit to the Motor Pod where the Motor would typically attach. These blanks are available for riders who don't remove their pod, creating a more hydrodynamic shape when not mounting the motor.
SKU: 012	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Aluminium Propellers: 2x Aluminium Propeller Blades Aluminium Propellers are the ultimate upgrade providing maximum performance, durability and style. These Anodised, 5 Axis CNC Machined blades have a refined shape, and are thinner, stronger and sleeker.
SKU: 013	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Standard Propellers: 2x Standard Propellers One pair of Standard Foil Drive Assist folding propellers. These propellers are the softest of them all, Durable or Aluminium Propellers may be better suited as a more durable option.
SKU: 014	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Durable Propellers: 2x Durable Propellers One pair of Durable Foil Drive Assist folding propellers. These propellers are more durable than the Standard Propellers. Standard or Aluminium Propellers may be better suited.
SKU: 113	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Motor Plug Protector: 1x Motor Plug Protector and Keychain This is a replacement Motor Plug Protector with Keychain for both Assist MAX and Assist Slim. This plug is important in keeping your electronics free of sand, debris and salt spray.

SKU: 114	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Mast Track Foam Inserts: 2x Pieces of Closed Cell Foam (300mm x 10mm x 28mm) Additional Mast Track Foam Inserts are available for Gen2 Systems. These are super important to improve connectivity between your controller and your kit, especially when using carbon boards. Additional pieces may be required to fill the entire length of the track.
SKU: 126	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Foil Drive 28v Standard Charger 4amp: 1x 28v Standard 4amp charger (No power lead) Efficiently recharge your Foil Drive Assist Slim Endurance Battery using the 28v Standard Charger.
SKU: 126	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Foil Drive 40v Standard Charger 4amp: 1x 40v Standard 4amp charger (No power lead) Charge your Gen2 Units efficiently with the 40v Standard Foil Drive Charger.
SKU: 127	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Foil Drive 40v Fast Charger 8amp: 1x 40v Fast Charger 8amp Charger (No power lead) Recharge Gen2 Foil Drive Batteries in less time with the 40v FAST Foil Drive Charger 8A. With 8A of power output, this charger ensures a quick and efficient charge.
SKU: 128-X	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		AC Power Lead: 1x AC Power Lead SKU: 128-01 AU/Type I SKU: 128-02 USA/Type A SKU: 128-03 EU/Type C Additional AC Power Leads for Gen2 Battery Chargers. While all kits come with the required AC Lead, these are available as additional or extras. Note: These are an adaptor lead only and can only be used with the Foil Drive Gen2 chargers.

SKU: 121	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Battery Grease: 1x 15g Tube of Dielectric Grease Dielectric Battery Grease should be used on all connections (Battery and Motor Plug) before every use to ensure a reliable connection between unit and motor cable, protecting against corrosion, heat, and oxidation. *Wholesale accounts please inquire about ordering in bulk.
SKU: 071	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Parallel Y Lead: 1x Parallel Y Lead For use with 2x Small 4.2ah Batteries, Assist PLUS only! With this Y Lead you can take 2x Small 4.2ah Batteries, join them together in parallel and enjoy your Assist PLUS with a medium capacity. Important instructions and limitations on our website.
SKU: 029	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Battery Discharge Device: 1x Battery Discharge Device, 1x Discharge Adaptor Lead, 1x Manual To ensure batteries remain at peak performance, we recommend storing between 40-60% charge. This device can automatically discharge your battery. Note: Also see Replacement Discharge Adaptor Lead SKU 033
SKU: 024	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Gen1 Lipo Bag: 1x Lipo Bag 245x400mm (9.6x15.7 inches) Lipo Bags can be used for transport, charging and storage of your Gen1 Foil Drive Lithium Batteries. These bags are made of a fire retardant fiberglass, in the unlikely event your battery has an issue, it can help contain a fire or excessive heat.
SKU: 133	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Gen2 Lipo Bag: 1x Lipo Bag 430x100x50mm (9.6x15.7 inches) Lipo Bags can be used for transport, charging and storage of your Gen2 Foil Drive Lithium Batteries. These bags are made of a fire retardant fiberglass, in the unlikely event your battery has an issue, it can help contain a fire or excessive heat.

SKU: 030	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Battery Checker: 1x Battery Checker - SKU: 030-01 22V SKU: 030-2 28V SKU: 030-3 40V The Battery Checker is a simple, compact device to read your battery percentages. There are three available that are set to read different voltages, 22V, 28V, 40V. These are not cross compatible so you must ensure you have the correct Checker.
SKU: 172-X	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		Inline Battery Checker: 1x Battery Checker The Inline Battery Checker can be plugged in between your charger and your battery allowing you to see an active read out of your batteries current state of charge.
SKU: 066	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		28v Battery Charger - Assist PLUS - AU/NZ Plug-Type I: 1x AUS Battery Charger with Adaptor for V1 or V2 Batteries 110-240v Lithium Battery Charger - This charger is for Assist PLUS Batteries ONLY Chargers are available in both AU or a US plug type.
SKU: 067	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		28v Battery Charger - Assist PLUS - US Plug-Type A: 1x US Battery Charger with Adaptor for V1 or V2 Batteries 110-240v Lithium Battery Charger - This charger is for Assist PLUS Batteries ONLY Chargers are available in both AU or a US plug type.

SKU: 032	ASSIST ASSIST PLUS ASSIST MAX ASSIST SLIM		V2 Battery Adaptor Lead: 1x V2 Battery Charger Adaptor Lead Specifically for customers with Gen1 V1 Batteries (2021- Mid 2023) where the plug on the battery is smaller than the plug on the updated chargers. V1 batteries must use this lead to charge with a newer version charger.

TOOLS

Foil Drive Kits are designed to be self serviceable, this means that there are a range of tools and repair parts available. While we have an extensive online Help Centre with videos, written step by steps and troubleshooting, customers can also send their systems to a Foil Drive Service Centre as well. Simply email support@foildrive.com and describe the situation and we can go from there!
